Prosperity for AFRICA through Textile Technology

Despite an enormous untapped potential for trade expansion between India and Africa, India's trade with Africa is concentrated in certain sectors and countries and is dominated by exports of primary commodities. While the potential for export diversification exists, it may not be realized without targeted intervention. India is today the 2nd largest Textile industry globally and has a strong base in Textile engineering, thus is well-positioned as a partner to improve the productive and export capacities of Africa. India's expertise can be leveraged to build textile industry in Africa through the sharing of knowledge, technology and lessons learnt.

ITME AFRICA 2020 is poised to be more than an exhibition and propose to bring to table complete solutions for Textile industry, Affordable technology, International exposure, learning and experience, confluence of business houses, Investment opportunities, Joint ventures, Networking with technocrats, educators, thus paving way for a wave of knowledge, progress, growth and prosperity.

Garnering tremendous response from Industry ITME AFRICA 2020 shall host prominent and key textile machinery manufactures from India & across the globe. Country Pavilions from Italy, Turkey, China & Switzerland shall showcase the Technology & Engineering expertise from their respective Countries apart from India. Engineering Exports Promotion Council (EEPC, Govt. of India) pavilion shall encourage & support Engineering companies from India to connect with African Countries. The event is supported by both Govt. of India and Govt. of Ethiopia and officials from 130 diplomatic missions present in Ethiopia shall be invited and are expected to visit ITME AFRICA 2020 to shall interact with exhibitors.
