NEW GENERATION OF PEGASE SPOOLING LINE

SPOOLEX GROUP

WHAT'S NEW IN JUMBO SPOOLING?

Spoolex Group launches the new generation of its well-known Pegase Jumbo spooling line: Welcome to Pegase4, the 7th model in the French company's range of spooling lines.

For several months now Spoolex's process experts have been working together with the engineering team to enhance the performances of the well-known Pegase Jumbo spooling line. Thanks to numerous material upgrade and new design, the Pegase key functions has been re-designed and improved to allow higher speed, wider products and easier operation, for always higher productivity…

Shalag: the first customer

Shalag the world leader in carded thermobonded and air through bonded nonwovens, trusts once again Spoolex to support its critical spooling project. With more than 30 years of experience and proven expertise, Shalag has developed a global reputation as cutting-edge developers and producers of numerous innovative Nonwovens marketed all over the world. To support its production increase at its North Carolina plant, Shalag has invested in the latest generation of Pegase line with 10-unit spooling heads. The two companies are proud to cooperate again on this new project and plan implementation this summer.

Always involved in Industry 4.0

For a couple of year now, Spoolex proposes, automated solutions to optimize products flow and reduce logistic complexity, with automatic solutions to transfer, to load, to splice, to unload and to pack, weight, wrap and label, final spools or bobbins. Today, to support the launching of the new Pegase4, the French company now proposes a new smart and complete solution for end of nonwoven lines…

ANEX 2018

Cyrille Pontet, General Manager and Pierre Croutelle, Sales Manager of Spoolex, will exclusively disclose the new Pegase4 generation and its latest smart automation system, on their booth 646 during ANEX exhibition. See you in Tokyo…
