# TSG Expands DEFEND® DWR to serve the Nonwovens Industry

TSG Finishing, LLC with operating plants in Hickory and Conover, NC is happy to announce the expansion of its DEFEND® brand of high-performance finishing products to its wide-width nonwovens coating and converting business.

"In less than 2 years DEFEND® has become the standard-bearer for high-performance finishing in the residential and contract upholstery markets," states Michael Goldman, President and 5th Generation owner of TSG. "Using the DEFEND® platform, we are now able to deliver the same level of customization and performance to the nonwovens market."

TSG has long been in industry leader in high-speed, wide-width finishing, servicing many markets including healthcare, construction, automotive and filtration. TSG's capabilities include both low- and high-viscosity coating to 156" (3,962mm), precision slitting and rewinding to 172" (4,368mm) and high-speed tentering for heatsetting applications. "The brilliance of DEFEND® is our ability to bolt-on additional capabilities to the DWR backbone, including anti-abrasion, anti-microbial, anti-static and FR," Goldman continued. "Providing custom solutions to solve our customers' needs has always been our bread and butter. DEFEND® just gives us another tool in the shed."

Current Capabilities offered by TSG Finishing:

- Coating & Tentering (Extending to 156 Inches)
- Slitting & Rewinding (Extending to 172 Inches)
- Low-Viscosity Coatings (Dips)
- High-Viscosity Coatings (Backing or Face-Coatings)
- Ability to Handle Difficult Materials such as Kevlar and Fiber Glass
- Custom Compound of our Chemistry

TSG Finishing currently has 3 finishing plants in Hickory and Conover, North Carolina that are dedicated to the enhancement of textile products. Executive offices are located in Devon, PA.
