Forging the Future: Shahi Exports and Little King Global Unite for Innovative Fabric Production

Shahi Exports, India's leading apparel manufacturer, has entered a joint venture with Little King Global, a prominent Taiwanese producer of synthetic sportswear fabrics. This partnership heralds the establishment of a cutting-edge processing facility in Shimoga, Karnataka, signifying a major leap in Shahi's expansion strategy. The Shimoga facility is not only expected to enhance the region's manufacturing landscape but also positions Shahi as a key employment provider in the area.

Scheduled to commence operations by the year's end, the plant will initially produce 500 tons of synthetic fabrics monthly, with plans to amplify this capacity to 1000 tons. The increase aims to meet the soaring demand for high-quality synthetic textiles.

Mr. Ramalingam T, CEO of the Knits Division at Shahi Exports, emphasized the strategic nature of this collaboration: "This venture goes beyond business growth; it's a pledge to deliver excellence in synthetic fabrics to our customers. We are committed to ongoing enhancement of our offerings and scaling up our operations while also focusing on job creation throughout India."

Little King Global brings over 40 years of specialized experience to the table, renowned for their innovation in fabric technology. Their expertise will undoubtedly elevate the production standards at the Shimoga facility, making it a benchmark in the industry.

Mr. Bruce Liao, Vice President of Little King Global, shared his vision for the collaboration: "We aim to set a global standard in providing sustainable, high-performance fabrics. Partnering with Shahi, known for its strong ESG commitments and innovation, aligns with the global shift towards more sustainable manufacturing practices. Our combined efforts at the Shimoga plant will focus on delivering environmentally friendly and technologically advanced textile solutions."

This partnership is poised to transform the fabric industry landscape, offering innovative solutions while fostering economic growth and sustainability in India’s manufacturing sector.
