ISKO's SS27 collection and latest collaboration with Adriano Goldschmied land in Milan at Denim Première Vision.

From the latest fabric technology collection to the Moonskin project, ISKO unveils the future of denim innovation featuring recycled fibers

ISKO returns to Denim Première Vision to present a powerful showcase of next-generation denim innovation. At booth D17, visitors will discover a full spectrum of ISKO's latest developments, including the brand-new SS27 collection, its advanced material collaborations with RE&UP, and the much-anticipated design project with Adriano Goldschmied: Moonskin Denim.

ISKO™ SS27 collection: lightness, authenticity, intelligent performance

A major highlight for visitors will be ISKO™ SS27 collection, a season that expresses a renewed vision of lightweight construction, soft tactility, and intelligent comfort. The collection blends innovation and craftsmanship through multi-fiber compositions combining modal, TENCEL™, and linen supported by ISKO POP™, ISKO TOUCH™, and advanced finishing technologies. A vibrant color narrative brings the season to life: the DIRTY WHITE™ story reimagines ecru, beige, and worn whites with a sun-washed purity, while new indigo expressions capture a bright, summery aesthetic.

Three capsule concepts anchor the collection:

- City Glam – A next-gen finish elevating denim with soft matte effects or glossy sheen,transforming each piece into a contemporary statement.
- D-Lite – Ultra-lightweight denim shirting that maintains true denim character whileenabling seasonless versatility.
- Future Face 2.0 – A woven denim engineered to deliver knit-like comfort with a refined,smooth surface designed for all-day wear.

Across the broader collection, ISKO redefines versatility and performance through its core technologies:

- ISKO™ MULTITOUCH – Multi-texture creativity within a single fabric.
- ISKO™ WE'RAW – Raw beauty with new lightweight indigos.
- ISKO™ RIGID – Neo-vintage constructions inspired by authentic heritage.
- ISKO™ REFORM + FITWISE – Dual-engineered stretch for precision fit and superiorrecovery.
- ISKO™ COMFORT + MECHANICA – Natural stretch with tactile structure.
- ISKO™ WONDERSOFT – Silkier touch, brighter handfeel.
- ISKO™ JEGGINGS ZERO – Ultra-fine, second-skin smoothness.

Together, these technologies create a complete fabric ecosystem – from raw to fluid, rigid to refined – designed for a new era of expressive, responsible denim.

Moonskin denim by Adriano Goldschmied

Rooted in a long-standing partnership built on shared vision and trailblazing creativity, ISKO and Adriano Goldschmied unveil a new chapter in their collaboration. The Moonskin project – developed with Daily Blue by Adriano Goldschmied – demonstrates the creative potential that emerges when cutting-edge textile engineering meets visionary design, and highlights ISKO's pioneering City Glam coating technology, a finish offering glossy brilliance or soft matte subtlety while preserving the authentic character of denim. These qualities frame Goldschmied's modern, fluid silhouettes, emphasizing soft tactility, refined surfaces, and a forward-looking aesthetic.

RE&UP: next-generation circularity for modern denim

ISKO's collaboration with RE&UP – which continues in the Moonskin denim project too –demonstrates how advanced textile-to-textile recycling can elevate the quality and performance of denim and how RE&UP's Next-Gen Cotton and Next-Gen Polyester fibers – engineered to match the performance of virgin materials – can integrate seamlessly into ISKO fabrics.

ISKO Luxury by PG: heritage reimagined

Closing the full offering at Denim Première Vision, ISKO™ Luxury by PG presents its own SS2027 collection – an elevated creative journey led by Paolo Gnutti. Developed through RECODE Denim, ISKO's highest circular technology, the collection reinterprets archival structures through modern craftsmanship, offering a deeply emotional narrative grounded in responsibility, heritage, and refined expression.

"Denim Première Vision is always an important moment for us," said **Fatma Korkmaz – Product Development Manager, ISKO. "**It is where we bring together creativity, performance, and responsibility. With the SS27 Collection, our continued work with RE&UP, and new chapters in our collaboration with Adriano Goldschmied, we are showing what the future of denim can look like: lighter, smarter, and more sustainable, without compromising authenticity."
