Meadow Grove Research Joins ITMF: A New Chapter of Knowledge, Collaboration and Global Growth

In today's textile industry, data is no longer just numbers—it is the foundation of every successful decision. As global markets become increasingly interconnected, the need for reliable intelligence and meaningful collaboration has never been greater.

Recognizing this evolving landscape, the **International Textile Manufacturers Federation (ITMF)** has welcomed **Meadow Grove Research** as its newest Corporate Member, marking an important milestone for the global textile and cotton value chain.

Meadow Grove Research has earned a strong reputation for its expertise in supply, demand and trade analysis of cotton and other soft commodities. By transforming complex market dynamics into actionable insights, the company empowers businesses to make informed strategic decisions with confidence.

Welcoming the new member, **Christian Schindler**, Director General of ITMF, emphasized that the federation continues to strengthen its role as a platform connecting every segment of the textile value chain—from fibre producers to finished textile manufacturers. He noted that access to specialized knowledge providers enables members to better understand changing market dynamics while benefiting from ITMF's extensive statistics, reports, surveys, conferences and global networking opportunities.

Expressing his enthusiasm, **Chris Kramedjian**, Managing Director of Meadow Grove Research, stated that the company is honoured to join such a distinguished international organization and contribute a unique market perspective to the ITMF community.

This partnership is more than a membership announcement—it reflects the industry's growing commitment to knowledge-driven growth. As the textile sector embraces digital transformation, sustainability and resilient supply chains, collaborations between research organizations and global industry associations will play a defining role in shaping the future.

Together, ITMF and Meadow Grove Research are building a stronger ecosystem where trusted intelligence, innovation and international cooperation create opportunities for the entire textile industry.
