

SKF India announces the launch of its new and competitive UC Range

The new Ball Bearing Units-UC Range is a competitive product offerings in response to the growing market demand and fits in perfectly to SKF's commitment of quality and reliable products

SKF India announces the launch of its new competitive product offering the Ball Bearing Units-UC Range India in response to the growing/ new market demand and its commitment towards locally produced products at global quality and reliability. These Ball Bearing units combine the Japanese Industrial standard (JIS) compatibility perfectly with SKF reliability.

The SKF Ball Bearing Units - UC range, comes with a dependable assurance of world class quality and superior

performance. The UC Range has an added advantage of being cost competitive, as it is manufactured locally in India and brings a higher availability and better service life to the market.

The solution is easy to install and directly interchangeable with JIS equipment available in the market today. The enhanced set screw locking system provides 16% better holding power and the rugged integral seal with flinger delivers effective protection in highly contaminated environment .

UC range finds applications in material handling, food and beverage, HVAC, metal, agricultural as well as in textile industry. The product is used in the application like low speed conveyors, screw conveyors, parcel and baggage handling conveyor compressors and fans, poultry equipment conveyors, construction equipment, and stone crushing equipment.

The newly launched ball bearing units provides a host of benefits including direct interchangeability, easy installation, Increased uptime, compliance with health and safety regulations.
