Colorjet Launch Its 16 Head Vastrajet® With AiS™ at ITMA 2019

COLORJET introduce its Next-Gen direct to fabric printer VASTRAJET®-8164 *and will also demonstrated its Metro-8166 for first time in Europe at ITMA Barcelona 2019.*

ColorJet the market leader in India unveil its Vastrajet® 8164. Following the success of Vastrajet®-8824, the new Vastrajet®-8164 with 16 heads is launched at ITMA 2019. The advanced, high speed direct to fabric printer has the ability to become the commercial winner by providing users with outstanding performance, increased productivity, superior printing accuracy with minimal maintenance needs.

The new Vastrajet® comes with the latest technological innovation from ColorJet – AiS™ i.e. Adaptive Ink System. The ColorJet AiS™ provides the customer flexibility to use ink of its own choice to fulfill multiple purpose. ColorJet strives to support their partners by bringing technological modifications by fine tuning the machine as per the inks. The new Vastrajet® also comes equipped with AIVC™ technology which provides consistent print performance at varying environmental conditions. With these technological innovations and additional refinements has made the Vastrajet® a market leader and in true sense a commercial winner.

“Being the leader of textile digital printing industry in India it comes as a responsibility to us to create state of the art products while keeping in mind the demands of the customers and ColorJet is dedicated to being at the forefront of fulfilling our customer’s needs,” said Jitender Pal Singh VP – Textile, ColorJet India Limited. Further adding, “When developing the Vastrajet® 8164, our engineers aimed to increase productivity, performance, and reliability, which ultimately resulted in a product whose performance increased up to 70 percent from its predecessor, making it one of the fastest printers in the market in this category.”

Also, ColorJet demonstrated its high-speed Metro-8166 which delivers industrial-level production with speeds up to 294 sqm/hr

As per the latest IDC report with more than 34% market share in India - the 2nd fastest growing digital textile printing industry, ColorJet gears up to command a strong position in the Textile Industry globally. ColorJet line up of products are best in the industry where ColorJet Machines has production speed which is 45% more than the nearest competition and takes 47% less space, consume 42% less power as compared to other machines, moreover, other machines consume 51 times more water as compared to ColorJet machines making it the most sought after brand with its products starting at $59,000. These improvements and the development of AiS™ technology is further proof of ColorJet’s commitment to address the textile industry’s most urgent needs worldwide.
