

Saurer to show Autoairo in Asia for the first time at 2nd CIIE

Originating in Switzerland and founded in 1853, Saurer is a leading globally operating technology group focusing on machinery and components for yarn processing. After having participated in the first CIIE last year, Saurer will once again take part in this important event this year, presenting its new air-spinning machine Autoairo, which the company launched at ITMA Barcelona on 20 June 2019. At the CIIE in November, the Autoairo will be exhibited in Asia for the first time.

Autoairo has set new benchmarks for air spinning. Saurer has combined its most advanced automation solutions with proven technology to create an air-spinning machine with unique properties. The Autoairo features autonomous spinning positions with individual drives and integrated intelligence. Its digital piecing unit is capable of performing up to 24 piecing processes simultaneously. As a result, the machine's run-up time is also reduced by at least 30%. The Autoairo's compact, double-sided design means that it takes up 40% less space than single-sided machines. These features give the Autoairo a powerful productivity advantage, while at the same time lowering spinning costs.

This innovation significantly increases efficiency. It is fully automated with autonomous, intelligent spinning positions, revolutionising air spinning. With Autoairo, spinning mills can produce high-quality yarn more quickly, more cost-efficiently and more flexibly.

With more than 160 years' experience, Saurer has always been committed to advancing the textile industry, integrating high-end equipment manufacturing with modern information technology to provide complete solutions for the smart spinning factory.

Our team looks forward to introducing this innovation to guests at the CIIE in Hall 3 at Booth B1-010 from 5 to 10 November 2019.

SAURER.

About Saurer Group

Saurer Group is a leading globally operating technology group focusing on machinery and components for yarn processing. As a company with a long tradition, Saurer has always been a leader in innovation. Today, Saurer comprises the two segments Saurer Spinning Solutions and Saurer Technologies. Saurer Spinning Solutions offers high quality, technologically advanced and customer-specific automation solutions for processing staple fibre from bale to yarn. Saurer Technologies specialises in twisting and embroidery as well as engineered and polymer solutions. With annual sales revenues of EUR 1 175 million, 4 700 employees, and locations in Switzerland, Germany, Turkey, Brazil, Mexico, the USA, China, India and Singapore, the strongly growing group is well positioned to serve the world's textile industry centres. Saurer is listed on the Shanghai Stock Exchange (securities code: 600545). www.saurer.com.

The Autoairo is Saurer's very first air-spinning machine.
