

Siyaram's ANTI-CORONA FABRIC

Siyarams ANTI-CORONA

A step towards protection

Siyaram's a leading fabric and garment manufacturer has also highlighted this concern. As a responsibility towards their customers and the entire community, Siyaram's has taken the task to solve this current issue.

After detailed research and extensive studies, Siyaram's has devised an innovative fabric as a solution to the problem of the ongoing contamination. To manufacture the best quality of this fabric, the brand has partnered with HealthGuard Australia, who is a pioneer in protective fabrics worldwide.

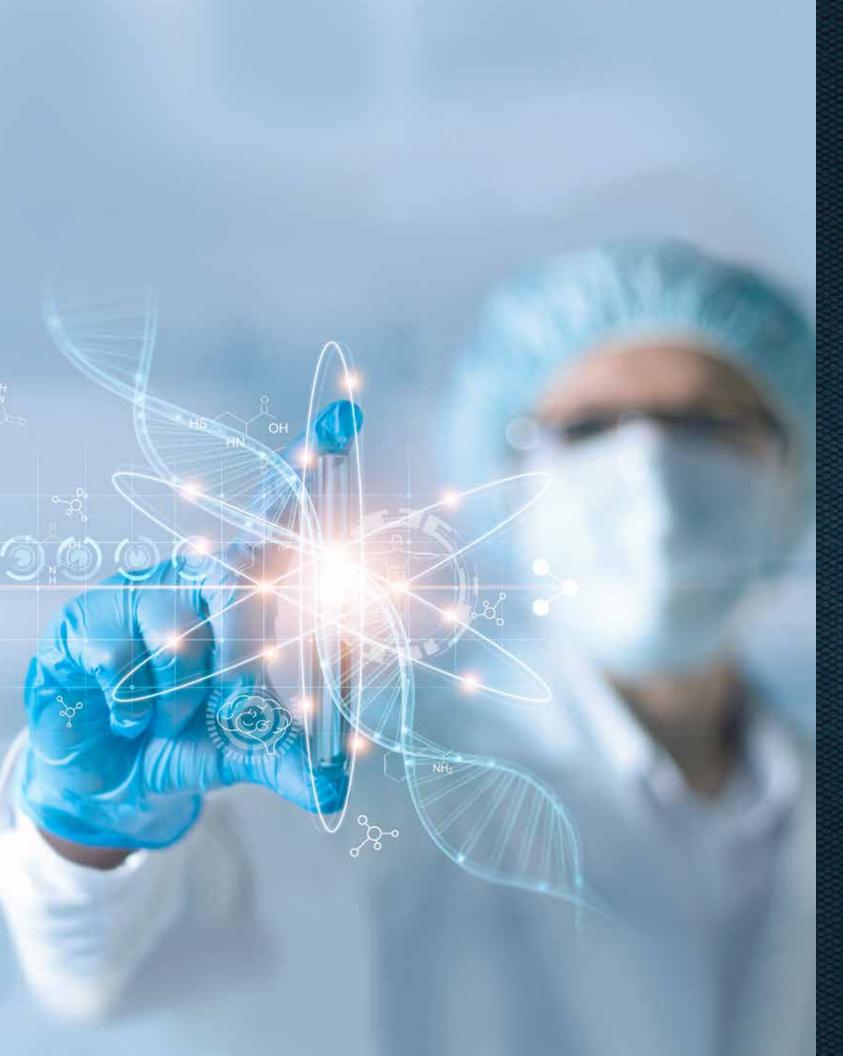

Siyaram's in association with HealthGuard presents the Anti-Corona fabric.

HealthGuard is a global leader for over 25 years in tailored non-invasive healthcare. It is an Australian company that is dedicated to research and development of safe innovative biotech solutions for a broad range of products. Each of its products is independently tested at world-leading facilities.

Siyarams's and HealthGuard's association has created a fabric that will protect you from the virus, in case you come in contact with it. The 'Cosmetic based chemistry' coating utilised in making the fabric, is made of positive compounds and when it comes in contact with the negative compounds, it disintegrates the outer lipid coating and destroys the virus in a few seconds. This technology is tested in the esteemed laboratories of Australia and India.

The wonders of Cosmetic Based Chemistry

Siyaram's and HealthGuard are both conscious manufactures and are aware about the effects of raw materials utilised in creating the product. They believe in enhancing and promoting eco-innovation solutions in the protective fabric industry. Therefore, HealthGaurd has developed a 'Cosmetic based chemistry' for manufacturing the Anti-Corona fabric. Similar kind of technology is applied while making cosmetics, thus it is 100% sustainable and skin-friendly.

Advantages of Cosmetic Based Chemistry

- Made of natural substances
- It doesn't harm the human skin
- It has no side effects
- All ingredients are sustainable and biodegradable: environment friendly
- It doesn't leach (emit) any harmful components in contact with liquid
- It renders a soft and smooth feel to the fabric
- Recommended by health experts

99.94 % EFFECTIVE AGAINST VIRUS - ISO 18184 TESTED

ANTI - BACTERIAL

HYGIENIC

SAFE AND EFFECTIVE

AUSTRALIAN MADE TECHNOLOGY

INHIBITS ODOUR (CAUSED BY BACTERIA)

LONG LASTING EFFECT

ADVANTAGES USING

IN THE FIGHT AGAINST CORONA VIRUS

HealthGuard AMIC technology, naturally forms a film, making it perfect for use on textiles, the residual film has ultra low toxicity and can be used over a wide pH range.

Independently tested as 99.94% effective. (In the reduction of Corona Virus on treated textiles)

Kills bacteria including super bugs, such as MRSA

Not heavy metal salt based.

Effective against a broad spectrum of gram positive, & gram negative bacteria.

Uses technology base is used in cosmetics.

HealthGuard AMIC has over 25 years of safety record.

Durable to multiple laundry cycles. Independently tested.

Compatible with all textile substrates.

Economical to apply.

Will not effect shade of dyestuffs.

Simple to apply by padding, spraying or exhaust methods.

Tested against SARS-Cov-2.

Why is this protective clothing necessary?

- When you step outside the house and walk around in an infected area, you might come in contact with micro droplets of residual sneezes and coughs. These infectious droplets suspend for hours and attach to our clothing, hands and faces, which exposes us to the possibility of ingestion.
- We may wear a mask to prevent inhalation, wash our hands but our clothes can carry live virus droplets for many hours. Putting the person wearing the clothes at serious risk.
- Therefore, if the fabric is capable of destroying the virus as it comes in contact with the fabric, it will eliminate this problem.

Siyaram's Anti-Corona Fabric is guaranteed 99.94% effective against Corona Virus (H1N1), SARS, Influenza Virus with a broad range of Anti-Microbial treatment. The fabric has non-leaching properties compared to other metal based chemistry products, that means the treated layer of the fabric does not dissolve in water.

UNTREATED FABRIC

Enveloped virus particles deposited on untreated textile

Untreated textile substrate

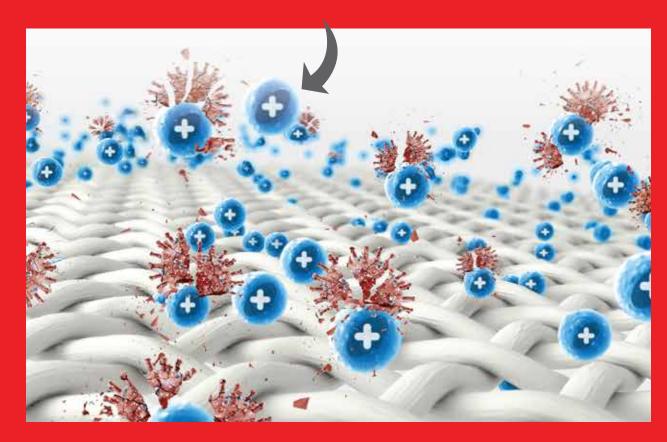

SIYARAM'S ANTI-CORONA FABRIC

HealthGuard ruptures the cell wall killing the DNA

HealthGuard AMIC Treated Textile Substrate effective against enveloped Corona Virus.

Tested Bacteria Including MRSA & E.Coil.

HealthGuard is a pioneer in research and development of non-invasive health care and biotech solutions for more than 25 years. Siyaram's in association with HealthGuard has innovated the 'Anti-Corona Fabric' provides protection from deadly viruses and bacteria that comes in contact with the surface of the cloth in a few seconds.

Advantages of the Anti-Corona Fabric

- Independently tested as 99.94% effective against Corona Virus
- Effective against a broad spectrum of bacteria and bugs
- Hygienic
- · Uses technology base that is used in cosmetics
- Durable for multiple laundry cycles, independently tested.
- The features do not affect the colour and dyestuffs of the fabric
- Made with natural based substances instead of heavy metal salt based properties
- Skin friendly and smooth texture
- Tested against SARS- Cov-2.

Dr. Christopher Harvey The owner of HealthGuard

"HealthGuard Australia is a pioneer in technology innovations for human benefits. Over the last 3 decades plus, we have been innovating products solving the real-life challenges of the world. We are happy to partner with Siyaram's to launch the "ANTI-CORONA FABRICS" that is effective against Corona Virus with 99.94% reliability.

Also, I am proud to share that, at HealthGuard we are deeply concerned about the after-effects of ingredients used or the final product and thus have developed a 'Cosmetic based chemistry' to derive such amazing results.

This is the latest technology that has no side effects and is superior to the old metal-based chemistry used by some of our competitors.

I strongly recommend Siyaram's Anti-Corona Fabrics developed in association with HealthGuard as a protective shield in our fight against the corona Virus!"

The future is promising

Siyaram's Anti-Corona Fabric provides a 24/7 silent sentinel protection from the deadly viruses. The fabric is not just effective it is comfortable too. We at Siyaram's have ensured that we do not compromise on the style quotient, the texture, the designs and the colour of the fabric. We want to enable our customers to stay protected in style. Made from natural components and sustainable technology this real Anti-Corona fabric is extremely stylish as well as skin-friendly.

In the coming days, the Anti-Corona fabric will not just be a trend it will be a necessity for everyone. This fabric is the smartest way to stay protected from the virus, and any other bacteria.

This fabric will allow you to embrace life after lockdown with full confidence and have an armour against the adversities.

Make the right choices and select a risk-free life. Choose Siyaram's Anti-Corona Fabric and let's fight this pandemic together.
