BRFL Textiles is poised to be the leader in fabric processing in India catering to domestic and international fashion trends

Mr. Prashant Agarwal, Managing Director at BRFL Textiles Private Limited (BTPL)

1) Is BRFL Textiles present in the Indian and International market?

Yes, BRFL Textiles Pvt Ltd supplies fabrics to both the Indian and International markets. BRFL Textiles exports fabrics to USA, Mexico, Japan, Germany, Netherlands, UAE, Saudi Arabia, South Africa, Indonesia, Hong Kong, Vietnam, Malaysia, Cambodia, Sri Lanka, Bangladesh, Thailand, Myanmar and others.

2) How do you see the Sustainability Concept in India?

To be Sustainable is to protect our natural environment while driving innovation and not compromising our way of life. This concept is being followed across the world, including in India. We as an organisation are fully committed to Sustainability and we are continuously working towards it. Some of our adoptions are:

- Reduced carbon footprint by doing co-generation of power
- Use of reverse osmosis for recycling water and reusing the same
- Use of recycled polyester yarn for making fabrics

- Working on new project to make fabrics using recycled cotton and linen fabrics

We also have the following certifications for sustainability:

- GOTS (Global Organic Textile Standards – Ecology and Social Responsibility) Certification
- OCS (Organic Cotton Standard) Certification
- GRS (Global Recycled Standard) Certification
- BCI (Better Cotton Initiative) Certification
- EUROPEAN FLAX Certification for Premium sustainable flax fibre

3) What is the technology used for weaving, knitting, processing, spinning?

BRFL Textiles is engaged in the processing of fabrics using world's best state-of-the-art European technology, right from pre-treatment to finished fabrics. Some of these are:

Process	Purpose	Machinery Brands
Mercerizer	To provide dimension stability alongside lustre, feel and colour	BENNINGER, Switzerland
Pre-Treatment	To remove impurities before dyeing or printing	BENNINGER, Switzerland
Yarn Dyeing	High quality yarn dyeing	LORIS BELLINI, Italy
E-Control Dyeing	Single batch continuous piece dyeing	MONFORTS, Germany
Batch Dyeing	High performance batch dyeing	THEIS, Germany
Printing	Screen printing machine	MHM, Austria
Stenter	To provide finish to the fabrics	BRUCKNER, Germany
Sanforizer	To control the shrinkage of fabrics	BRUCKNER, Germany
Calendaring	To compact the finished fabrics	BRUCKNER, Germany
Airo	To provide permanent softening effect and natural compaction of fabrics	BIANCALANI, Italy

4) What is BRFL Textile's plan for the years 2021-2025?

The immediate plan is to utilise the installed capacity of 4,00,000 meters/day. We will also look at simultaneously dominating the domestic market through robust distribution networks, driving innovative products across Linen, Cotton and Viscose fabrics and strengthening our brands, viz., Bombay Rayon, Linen Vogue La Classe', Giza Classe' and Dickens & Browne.

5) How will the Rs 240 crore equity infusion from JM Financial Private Equity and Think Investments be used by BRFL Textiles?

The equity infusion to be used primarily towards upgrading current technology and supporting the working capital requirement. We are now a debt free company which gives us enough flexibility and liquidity to service our clients.

6) Do you have any message for global customers and suppliers?

With our renewed focus and financial profile combined with our state-of-the-art production facility, BRFL Textiles is poised to be the leader in fabric processing in India catering to domestic and international fashion trends. We are the supplier of choice for our clients due to our design capabilities, market intelligence, innovation, cost effectiveness and efficient lead times. Our financial position and large volumes make us a sought after client for our suppliers.
