

Eruslu Nonwovens Group to Enter the Biodegradable Nonwoven Market with Truetzschler Nonwovens' Machinery

Truetzschler Nonwovens will deliver equipment to enlarge an existing spunlacing line into a flexible, state-of-the-art production line for various light to heavy weight sustainable nonwovens.

When the Eruslu Nonwovens Group (ENG) invested in a Truetzschler Nonwovens' spunlacing line in 2015, it became clear that the company was heading for growth. The line, consisting of a single NCR random card, AquaJet and a drum dryer had already been laid out for later extension. All components were either fully equipped or designed to deliver higher performances.

Last year Eruslu decided to broaden its portfolio in the wipes segment by adding biodegradable products from renewable resources. The group took full advantage of the 2015 small capacity line and went for:

- A second NCR random and a NCA airlay card
- fiber preparation and card feeding equipment for the two new cards
- More hydraulic power to reliably and efficiently hydroentangle multi-layer webs
- An extension to the dryer for increased evaporation capacity

After starting up in the second half of 2022, Eruslu will be operating an ultra-modern, highly flexible NCR-NCA-NCR spunlace line, the first of its kind in Turkey. The line is tailor-made to process virgin cotton fibers, comber noils and short fibers at high speeds. End products are top-quality, lightweight natural wipes or heavy-weight, three-layer nonwovens for cosmetic pads.

About Eruslu Nonwovens Group

Eruslu Nonwovens Group, established in 1972, is a leading Turkish company specialized in the production of various textile products.

Eruslu Nonwovens, part of Eruslu group, is located in Gaziantep, Turkey. In the nonwovens sector, the company provides disposable products for the home cleaning and health sectors. Since 2004 the portfolio comprises diapers for adults and children, wet towels and pocket towels. Products are exported to more than 100 countries worldwide.

About Truetzschler and Truetzschler Nonwovens

With about 3,000 employees, Truetzschler is one of the leading textile machine manufacturers in the world. Truetzschler specializes in machines, systems, and accessories for spinning preparation, nonwovens, and the chemical fiber industry. Founded more than 125 years ago, the company is headquartered in Moenchengladbach, Germany. It has additional locations in Germany, India, China, Brazil, the USA, and Switzerland.

Truetzschler Nonwovens is a division of the Truetzschler Group with a focus on complete production lines and machinery for hydroentangled (spunlaced), through-air and chemical bonded nonwovens. Its range of products includes solutions encompassing the entire nonwovens process chain from fiber preparation, web formation, web bonding, and finishing to drying and winding.
