

Digitization in the Spinning Mill

Press conference Swissmem, February 8, 2022

Selwyn von Grünigen, Head of Automation & Digital

Digital Transformation Opportunities in the Spinning Industry

Two mega trends offer opportunities for digital technology

Global digitization

- Experiences with digital technologies in private life and a generation shift
- Need for quick access to relevant information is increasing

Labor market challenges in the spinning industry

- Difficulties in finding operators
- Increasing wages
- Lack of reliable and quality conscious personnel

Digitized Rieter System

Shift from monitoring single machines to managing entire process

ESSENTIAL – All-in-one mill management system
