Huntsman receive this highly-coveted recognition from Indian Chemical Council

Huntsman retains ICC approval to use Responsible Care® logo

- Huntsman India has received permission for use of Responsible Care Logo, for three years till December 2024 from the Indian Chemical Council

Huntsman, a global manufacturer and marketer of differentiated chemicals, today said it had retained the highly recognized Responsible Care® certification from January 2022 to December 2024.

This certification, which is given after a comprehensive assessment by the industry experts and assessors, permits Huntsman India to use the Responsible Care logo until 2024 and finds a place Indian Chemical Council's (ICC) accreditation list for manufacturing and distribution operations in India.

“It is humbling to receive this highly-coveted recognition from Indian Chemical Council,” said Rahul Tikoo, Managing Director- South Asia Region at Huntsman Corporation. “And a testament of our team’s ability to remain agile and push the limits of what’s possible to protect our people, our communities and the environment, while advancing our 2030 Sustainability Goals. This is one among many steps towards our endeavor to build world-class sustainable manufacturing operations at Huntsman.”

“At Huntsman we continuously strive to improve our operations as per the guiding principles of Responsible Care®. The learning culture so generated helped positively not just on EHS aspects but also improved the quality of our business & the talent,” said Mr. Kamlesh Kushalkar, Head Corporate EHS, Huntsman International.

Huntsman Corporation is founding member of Responsible Care, the industry’s environmental, health, safety, and security performance initiative. This program helps member companies elevate the safety of their employees, support local communities, and protect the environment all while enhancing performance.
