

Domotex Turkey 2022

Vandewiele team is delighted to welcome its customers again on the next edition of the Domotex exhibition, in the capital of carpet, Gaziantep.

Apart from many traditionally woven carpets on the RCE+ carpet weaving machine, Vandewiele will also promote the digitally controlled RCF machine with Fast Creel, cut-loop machines, and specific machines for weaving light carpets. All will be illustrated by carpet samples. The digital control of yarns allows the development of new qualities, a **higher production efficiency** and a closer follow-up of the machine park. Yarn waste is reduced at the **highest production speed**. Combinations of cut pile carpets with flatweave as well as sisal look carpets will be presented.

Naturally, also the **highest carpet qualities** in reed 1000 d/m 10 colours, 1200 d/m and 1500 d/m with up to **5.000.000 points/m²** will be shown.

In tufting, the digital control of pile yarns (active yarn feed, also called IPD) has allowed Vandewiele the development of high definition Colortec 1/10" tufting carpet in 8 colours – or 1/7" gauge, competing with the traditional Axminster carpets. But also, solutions for plain carpets, artificial grass and our Myriad machines for tiles and other applications will be highlighted.

On Beijimac side, we will be delighted to present you in detail our **new autonomous shearing machine**, the ATSH. This machine is an example of how we develop new technologies to fill the needs of our customers. For the back coating the focus will be energy saving, an important topic nowadays.

Our customers have the capacities to develop designs and create real art. Therefore, we are also looking forward in exchanging ideas with them. Let this Domotex exhibition be a meeting point for everyone in the carpet business: weather active in weaving, tufting, yarn extrusion, heat setting or finishing. Looking forward to meeting you all again over there!

About Vandewiele

We build carpet looms, velvet looms, jacquard machines and integrate innovative textile systems for flooring qualities, home linen, fashion fabrics and technical textiles. Sharing inspiration and expertise with our customers worldwide, helps us to shape the textile industry of the future. Creating success for them all, from yarn to finished product.

Our Research and Development department and test-engineers are continuously developing new applications. The innovative breakthroughs of Vandewiele give a boost to the textile industry.
