ITM: Saurer Twisting Solutions presents twisting and cabling innovations

Saurer Technologies – Twisting Solutions will be present at the İkiler Tekstil Booth 311B in Hall 3 and will be happy to provide information about the CarpetCabler/ CarpetTwister and CompactTwister machines.

Carpet Twister

Making its mark on the carpet industry

	CarpetCabler

For over 35 years, our CarpetCablers and CarpetTwisters have been producing high-quality yarns for sophisticated carpets and other textiles. Innovative developments, use of the latest technology at all times and the readiness to go one step further with and for our customers have been a common thread over the decades. This product portfolio covers with conventional and computer controlled machines all requirements.

Leader in the production of twisted staple fibre yarns

The CompactTwister has been established in the market for over 25 years. The latest generation, the series 8, once again sets new standards for the quality of twisted yarn, flexibility, energy consumption, robustness, lower space requirement and ease of maintenance.

Compact Twister

More than five million supplied spindles demonstrate its leading position on the market. Thanks to innovative development and the latest production methods, the CompactTwister offers high efficiency combined with excellent quality of the cross-wound delivery packages produced.

Automation technologies boost processes in the mill

The above machines can be used in conjunction with tailored transport automation from Saurer Automation Solutions including the Robot AGV and Palletiser. Integrating these solutions into the textile plant allows for substantial time and cost savings.

Saurer Twisting Solutions looks forward to welcoming visitors at the İkiler Tekstil Booth 311B in Hall 3 from 14 to 18 June 2022.
