Great success for LAIP, Italian dyeing machines producer, at ITM Turkey

After a long time, LAIP was happy to meet again live clients, partners and technicians at the just over ITM Exhibition in Istanbul. Many visitors from Turkey, Africa and the Middle East contributed to making this event a great success! Together with the Turkish agent, Oguz Machina Sanayi, we welcome many customers at our stand, talking about LAIP innovations and technologies.

Jet 250 HT for fabric dyeing was very much appreciated because it grants perfect results with a low liquor ratio and no machine downtime while for yarn and tow dyeing, the **198 HT** was indeed another hit.

LAIP machines have increasing success in Turkey, and most important textile companies have chosen LAIP to optimize their dyeing process.

The feedback received during ITM and the orders closed during the exhibition are a confirmation of how the company values such as tradition and innovation are the right path.
