

## Textile Engineering Industry making strong foundation of entire value chain

Industry is doing good shape even though we are facing various challenges and concerns under TUF schemes. But at same time office receiving timely support from the industry as & when required. She also suggested to push more focus on asset definitions which eventually simplify the process of implementation in TUF scheme and also this would help in resolve the past pending issues/cases.

Government is looking very positively on textile sector particularly on TEI where 60 to 70% cost is under machinery base with most of the value chain by enhancing its production capacity by providing various government supports.

Government currently looking for address on issues like access of raw material, processing and getting that to the market access. And for the same our Commerce Minister Shri Piyush Goyal ji emphasis to moving ahead with the same direction to provide all industrial support from govt.

Quality assurance and sustainability are two most concerns on which industry needs to guide the country to take it on world standards that's what government expect from industry to ensure and deliver.

In last madam assure the best schemes and policies will deliver to our industry from government but government also look forward that whatever promise they received from PLI 1 & PLI 2 in terms of investment from the industry is also need to achieve, otherwise the whole working would lose its steam. And finally, she expressed her gratitude for inviting her to all office bearers and members of TMMA.

*Abstract from the Speech of Mrs. Roop Rashi Mahapatra, Textile Commissioner at the "62<sup>nd</sup> Annual General Meeting of TEXTILE MACHINERY MANUFACTURERS' ASSOCIATION (INDIA)MUMBAI*
