TECNORAMA Right-First-Time solutions for dye-house automation, the latest evolution at India ITME 2022

As a consolidation of its presence in India, TECNORAMA will be at India ITME 2022 to showcase the latest innovations in fully-automatic philosophy for dyeing laboratory automation. The worldwide known **Dos&Dye**®system is the first and the only one to develop the RIGHT RECIPE for bulk dyeing machines, in order to avoid correction and re-dyeing in production with considerable time and resource savings. Composed of a Dosorama dispensing machine and a robotized dyeing module, Dos&Dye® works independently for 24 hours a day and 7 days a week. It automatically performs the entire dye-bath process without any operator intervention and matches the features complying with Industry 4.0.

Fully integrated in Dos&Dye®, the new **Dosorama Smart** and the **Dosorama Clever** laboratory dispensing machines present the innovative “MONO-PLUNGER” system maintaining all the features of Dosorama dispensing machines, such as speed of execution, dispensing accuracy and elimination of contamination typical of the obsolete mono-pipette systems. They have been specifically designed to considerably reduce the need of technical intervention and to guarantee an easy maintenance.

We will welcome our clients, visitors and technicians at the stand of our agent **Kailash Textech Solution** – **H5 G12** during next India ITME
