

ITME-22, A Grand Successful Textile Exhibition for Saurer.

Saurer believes students are the future industry

Where Saurer have exhibited their range of product with new innovations and latest technologies from Pre spinning, Ring-Spinning, Open end Spinning and Air Spinning along with twisting and cable doubling machines and the Textparts new innovative components also.

Saurer also exhibited our Senses – a complete mill management solutions and lab products.

AutoAiro- Air spinning is one of the influential products and attracted more visitors. After this show we received many requests from the various textile institutions to explain about Saurer innovation for their students.

In the series of same first Saurer started through online webinars for MLV- College of textile engineering, Bhilwara- On 23rd dec'22.

There Saurer got a ratification welcome, and they had a about 150 students and staff members in webinars.

Ensuing, Saurer organised a live seminar at PSG- College of technology- Coimbatore, there also Saurer had a assent welcome and the seminar was most successful. Here also about 170 student and faculty members are attended.

From both the institutions Saurer had a detailed conversations with students and even after sessions also Saurer used to receive their queries through emails and Saurer continuously work to get clarified. Saurer offered News letter subscriptions to institutions and students, from this they will get regular updates on Saurer latest innovations and developments.

Further Saurer is continuously working on this to transfer the new innovations and knowledge to the students. And Saurer believes students are the future industry, they may be a customer or may be an employee for our business.
