

## How designs on fabrics have been evolved

The textile patterns are been an inspiration from different aspects like nature, art, and more. For many decades the tradition of clothing indicates the social status of various members of society. Attire today matters on the fabric to then create an attractive purchase for the fashionista. Fabrics then have fancy names like knitted, woven, cotton, and more. What matters is how the fabric feels lightweight brings you comfort and makes you have a perfect appearance. A fab design completes the Fabric, no more on the design that can have made the genz go vogue:

- **Checked:** Most popular pattern design which suits most Indian body types. This pattern seems to stay longer in trend, especially during summer-spring. The bright and eye-catching pattern is just flawless with the perfect additional vintage look from corporate to party nights.

- **Ikat:** There's something undeniably attractive about ikat. It is a dyeing technique used to create distinctive styles of textile patterns. Ikat is made by dyeing some threads before weaving the fabric. One should always have an ikat design outfit their wardrobe as it favors all time of the day.
