## "Smartex FACT: The Textile Revolution in Digital Factory Management"

Gone are the days when knitting factory owners had to be on-site to monitor every nuance of their production. Welcome to the era of Smartex FACT, a groundbreaking digital factory management solution that places your entire textile factory in the palm of your hand. This revolutionary platform allows you to streamline operations, monitor in real-time, uphold stringent quality controls, and even automate inspections - all accessible wherever you are.

Imagine starting your day with a clear overview of the previous night's factory activities, even before the first sip of your coffee. That's the transformative change Smartex FACT brings. It addresses the age-old industry challenges of inefficiency, inconsistent quality, and reliance on manual checks, ensuring you're always a step ahead in the fiercely competitive textile industry.

### Here's a deep dive into what Smartex FACT offers:

**Automatic Roll Grading:** Define your quality standards and let Smartex FACT's AI-driven system handle the grading of knitted rolls. Traditional methods see a mere 10% of rolls inspected. With Smartex, 100% of rolls are automatically checked, ensuring consistent quality.

**Digital Factory Overview:** Get a snapshot of your factory's performance - from running machines to daily roll production, all in one convenient dashboard.

**Detailed Machine Analytics:** Harness the power of data with insights on each machine's RPM speed, operational hours, and overall performance, allowing for optimal efficiency and quality.

**Comprehensive Roll Quality Checks:** Review a month's worth of production history, pinpoint defects using a digital roll map, and gain unparalleled clarity on the quality of your rolls.

**Real-time Notifications:** Stay updated on everything that matters - from machine RPM deviations to quality alerts, ensuring timely interventions and corrections.

Smartex's Co-founder and CEO, Gilberto Loureiro, shares the vision, "Smartex FACT is more than just a product; it's a revolution in manufacturing and quality control. Whether you're flagging quality inconsistencies or detecting production hitches, with Smartex FACT, your factory is literally at your fingertips."

As innovators in the textile sphere, Smartex continues its legacy of transforming the industry with state-of-the-art software solutions. With Smartex FACT, we are not just offering a product but ushering in a new era for textile factories, equipped with actionable data and advanced efficiency. The future of the knitting textile industry is here, and it's digital.
