

## Inauguration of Garden Silk Mill's State-of-the-Art FDY Plant: A Leap Forward for India's Textile Industry

The inauguration of Garden Silk Mill's Rs. 1250 crore Fully Drawn Yarn (FDY) plant in Kadodara, Surat, is a significant development in the textile industry, highlighting India's ongoing advancements in textile manufacturing capabilities. With the presence of Union Minister of State for Textile, Darshana Jardosh, at the inauguration, this event underscores the government's support for the textile sector, which is a vital part of India's economy.

The FDY plant, known as Spinning 1, with its substantial daily capacity of 272 tons, is set to produce polyester yarn, a key raw material in various textile applications. This plant represents a significant investment in the industry, aimed at boosting production capacities, supporting the textile sector's growth, and potentially contributing to job creation and economic development in the region.

The involvement of high-profile individuals such as Dr. Purnendu Chatterjee, the group chairman, CEO Debi Prasad Patra, and George Stausberg from the Oerlikon Group, indicates the importance of this project within the industry and its potential impact on the market dynamics of polyester yarn production.

This inauguration not only marks a milestone for Garden Silk Mill but also reflects the broader trends in the Indian textile industry towards technological advancement and increased production capacity. The establishment of such a facility could also enhance India's position in the global textile market by increasing its competitiveness and ability to meet the growing demand for textile products.
