

Discover the TechnoCorder TC2's Latest Innovations at Techtextil 2024

Techtextil stands as the premier global expo for technical textiles and nonwovens, attracting industry professionals to Frankfurt from April 23 to 26, 2024. Saurer Twisting Solutions, a consistent participant, eagerly anticipates hosting clients and specialists from around the globe at Booth B52 in Hall 12. This year, the spotlight shines on the TechnoCorder TC2, a two-for-one twisting machine renowned for its groundbreaking innovations and substantial benefits for users.

Industrial yarn twisted

The TechnoCorder TC2 exemplifies high performance in twisting both single and multiple yarns across a vast spectrum of materials and counts. Saurer's continuous enhancement of the TechnoCorder TC2 guarantees its users a formidable edge in the competitive landscape.

Enhanced Flexibility with TechnoCorder TC2

Yes, indeed! The TechnoCorder TC2's versatility, augmented by PreciWinding and Oiling options, now includes novel additions such as the fine yarn count pot and specialized equipment for coarse yarn counts. These innovations significantly extend the yarn count range of the gauge 670, allowing users to diversify their product offerings.

TechnoCorder TC2

Solutions for Fine Yarn Counts

The introduction of the new fine yarn count pot reduces the minimum processible yarn count to 110 dtex, facilitating the production of sewing yarns among other fine products.

Addressing Coarse Yarn Counts

Our latest equipment for coarse yarn counts in gauge 670 overcomes the challenges of processing bulky yarns, expanding the yarn count capability to up to 33,000 dtex with a balloon limiter ring. This enhancement simplifies the diversification of product portfolios.

Additional Innovations and Benefits

The newly engineered ball yarn brake not only prevents yarn debris accumulation in the brake chamber but also allows for rapid brake adjustments. This innovation reduces setup times and cleaning efforts, thereby boosting the machine's uptime and productivity.

The Saurer exhibition team eagerly awaits the arrival of customers and visitors at Techtextil 2024, ready to showcase the TechnoCorder TC2's advantages in Person
