

Savio Set to showcase its latest technological advancements at ITMA ASIA + CITME 2024

Savio is set to showcase its latest technological advancements at **ITMA ASIA + CITME 2024** in Shanghai, China, from October 14-18, 2024. This premier textile event will bring together industry leaders, offering an unparalleled platform for exploring cutting-edge innovations, forging global connections, and discovering the latest trends in the textile industry.

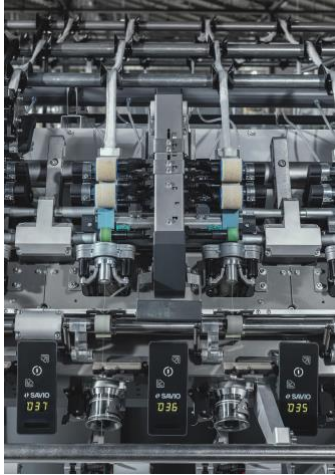

At **Hall 8, Booth C38**, Savio will present two flagship machines: the **Proxima Smartconer®** and the **Lybra Smartspinner®**, both representing Savio's commitment to innovative technology and excellence.

Proxima Smartconer®: Redefining Winding Technology

The **Proxima Smartconer®** is a groundbreaking automatic winder designed to meet the demands of Industry 4.0 and the Internet of Things (IoT). This high-tech machine delivers exceptional productivity, energy efficiency, premium yarn quality, and superior automation, all while ensuring seamless data connectivity. With a focus on reducing manual labor, increasing efficiency, and minimizing waste, the Proxima Smartconer® sets new standards in winding technology.

Lybra Smartspinner®: Spinning the Future

Savio's **Lybra Smartspinner®** is a versatile air-jet spinning machine designed to cater to specific textile applications such as knitting, home textiles, and sunshades. Offering high production rates with low processing costs, this machine integrates spinning, winding, and roving processes, while using 25-30% less space compared to traditional ring-spinning machines. Lybra Smartspinner® ensures flexibility, cost-efficiency, and unmatched performance in producing soft, smooth, and fashionable fabrics.

Join us at ITMA ASIA + CITME 2024 to discover how Savio continues to revolutionize the textile industry.
