

## Revolutionizing Fabric Touch: TSA Tactile Sensation Analyzer at SaigonTex 2025

emtec Electronic GmbH is pleased to announce its participation from April 9 – 12 in SaigonTex 2025, one of the leading international exhibitions for the textile and garment industry in Vietnam. The TSA Tactile Sensation Analyzer along with the innovative cloud-based Virtual Haptic Library, will be shown by their trusted sales partner GOIN International Vietnam Co. at the booth no.1H-10 in Hall A.

The TSA is a state-of-the-art measurement device that objectively evaluates the haptic properties of textiles and nonwovens, providing crucial data for manufacturers, brands, and suppliers. The Virtual Haptic Library complements the TSA by offering a digital platform to compare and analyze haptic characteristics, ensuring consistent quality and customer satisfaction worldwide.

“SaigonTex is an excellent opportunity for the industry to explore cutting-edge technologies that enhance textile quality assessment and production efficiency,” says emtec’s sales representant for Vietnam Tony Nguyen from GOIN International Vietnam Co. “We are excited

to demonstrate how the TSA, combined with the Virtual Haptic Library, can revolutionize their textile evaluation processes.”

Industry professionals attending SaigonTex 2025 are encouraged to visit the Hall A and booth no. 1H-10 for a live demonstration of the TSA and the advantages of the Virtual Haptic Library.
