Zero added PFAS Filtration Media for a Cleaner World

Goutham Viswanadam, Dimitry Papkov, Sudheer Jinka

FiltXPO™
International Filtration Conference & Exhibition

PROBLEM STATEMENT

Per- and polyfluoroalkyl substances (PFAS), a group of synthetic 'forever chemicals' used extensively in many industries because of their unique properties.

PFAS based water repellents are known to provide good oil and water repellency. In addition, they also contribute to reduced filter element pressure drop at a given efficiency.

Valuable PFAS Properties

- Oil and water repellency
- Thermal stability
- Chemical stability
- Excellent process compatibility

SUSTAINABLE APPROACH

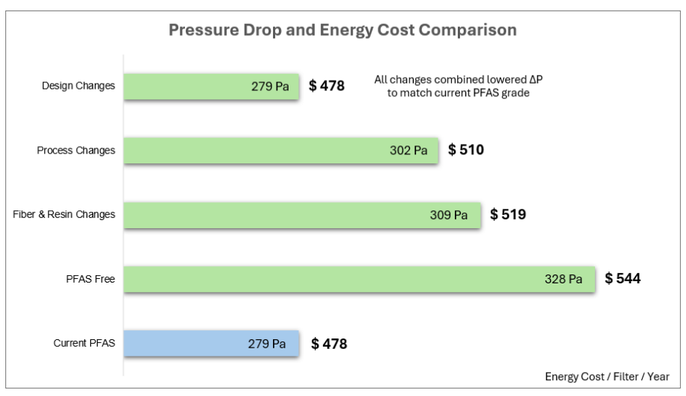

PROVEN PERFORMANCE — PlusZero™ — ZERO ADDED PFAS

PFAS

Hollingsworth and Vose launched PlusZero™, a range of HEPA and HVAC media with zero added PFAS designed to support the sustainability goals of our customers.

INNOVATIVE FILTRATION SOLUTIONS

PROVEN MARKET LEADING PERFORMANCE

PATENT PENDING

matching water repellency and performance

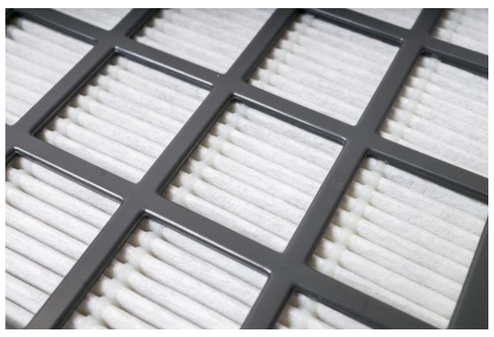

Patented PlusZero™ media has been vetted by modelling data and real time field application by some of the top filter manufacturers.

FIRST IN THE MARKET

HEPA

- Pharmaceutical
- Semiconductor
- Medical & other

HVAC

- Commercial
- Industrial

CONCLUSION

Creating a cleaner world and a more sustainable future

Sustainability

High Performance

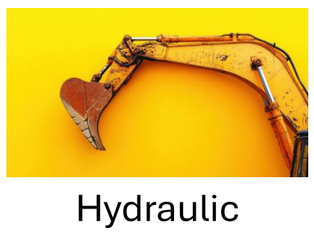

Cost Effective

Other PlusZero™ Applications

Fuel

Hydraulic

Coalescer

PlusZero™ – H&V's comprehensive line of high-performance solutions manufactured with zero added PFAS
