**Stäubli Powers a New Age of Intelligent Weaving at ITMA ASIA +CITME 2025**

At ITMA ASIA +CITME 2025, Stäubli raises the bar for textile engineering with the launch of the **SAFIR PRO S37** – an advanced automatic drawing-in machine built to power the next generation of high-speed, high-precision weaving. Purpose-engineered for filament yarns, this breakthrough solution helps mills achieve faster processes, superior fabric quality, and consistently reliable results.

**SAFIR PRO S37 automatic drawing-in machine , Offering a very high-speed with efficiency, flexibility and high-fabric quality**

In a world where speed, accuracy, and automation define competitiveness, the SAFIR PRO S37 stands as a game-changer for applications such as airbags, sportswear, waterproof fabrics, and technical materials like fiberglass used in printed circuit boards.

## Key Advantages of the SAFIR PRO S37

- Exceptional drawing-in performance for filament yarns
- Reduced yarn handling, minimized breakage, and enhanced quality
- Optimized engineering for lower downtime and smooth workflows
- AWC Layer & Offset Management for precision, flexibility, and error-free double-beam handling

## Empowering Excellence Across Every Fabric Application

At the Stäubli booth, visitors can explore a full spectrum of weaving innovations designed to elevate productivity and quality:

- **TIEPRO Warp Tying Machine** – High-speed tying with unmatched reliability. A special customer story from Danarmas, Indonesia, showcases its success: *"Low maintenance costs, user-friendly design, and outstanding productivity,"* notes the Director.

**TIEPRO warp tying machine,For quality tying of all types of standard yarns**

- **Electronic Rotary Dobbies (S3280, S3017/S3018)** – For beautifully woven patterned fabrics at maximum speed.

**Electronic rotary dobby S3280,for weaving all types of patterned fabrics**

- **S1792 Cam Motion** – Engineered for superior performance on air-jet and rapier looms.
- **LX PRO Jacquard Machine** – High output, low energy consumption, and versatility across flat, terry, and technical fabrics.

**LX PRO Jacquard machine,Robust, wear resistant and energy efficient**

- **ALPHA 580 UNIVERSAL Carpet Weaving System** – Displaying premium-quality carpet samples created with precision and durability.

Backed by more than **130 years of R&D excellence**, Stäubli continues to empower mills worldwide with machinery that blends reliability, performance, and future-driven design.

## MyStäubli – Your Digital Partner in Productivity

The **MyStäubli** portal offers mills an integrated service ecosystem—technical documents, tutorials, maintenance tracking, and real-time support—ensuring seamless operations and maximum uptime anytime, anywhere.
