Wangjin holdings signs 10th production line agreement with Trützschler – Driving innovation in the eco-friendly nonwovens industry

Signatories (from left to right) Mrs. Yuping Wang (Chairman of Wangjin Holdings), Mr. Matthias Schemken (Managing Director of Trützschler Nonwovens)

Representatives of Trützschler and Wangjin Holdings at the signing ceremony (from left to right) Mr. Ian Zhuang (CSO of Wangjin Holdings), Mr. Philip Liu (Director of Marketing & Sales of Wangjin Holdings), Mr. Weiping Zhang (Vice General Manager of Trützschler Textile Machinery (Jiaxing) Co., Ltd.), Mrs. Yuping Wang (Chairman of Wangjin Holdings), Mr. Matthias Schemken (Managing Director of Trützschler Nonwovens), Mr. Hongwei Zhu (General Manager & CTO of Wangjin Holdings), Mr. Harald Schoepp(General Manager of Trützschler China)

The global nonwoven industry continues to advance toward greater innovation, sustainability, and production efficiency, and one of the latest examples of this transformation comes from the strategic collaboration between Wangjin Holdings and Trützschler. The two companies recently signed a milestone agreement for the commissioning of Line 3 of the Wangjin Industrial New Material Technology Co. Ltd., a subsidiary of Wangjin Holdings, in Geneva, Switzerland on May 20, 2026. The agreement marks the tenth production line partnership between the two companies and further reinforces Wangjin Holdings' position as a leading innovator in the global hygiene and nonwoven products sector.

The newly commissioned Line 3 represents a major technological advancement for Wangjin Holdings. Equipped with advanced intelligent manufacturing systems, the line significantly improves production efficiency, enhances product quality consistency, and strengthens the company's ability to meet growing international demand for high-performance nonwoven materials. The collaboration also reflects the increasing importance of smart manufacturing technologies in modern hygiene product production.

Over the years, the partnership between Trützschler and Wangjin Holdings has evolved into a model of strategic industrial cooperation. Their collaboration has consistently focused on technological upgrades, intelligent production solutions, and sustainable manufacturing development. By integrating advanced equipment with strong operational expertise, Wangjin Holdings has steadily expanded its production capacity while maintaining high standards of quality and innovation.

The company has successfully established a strong international market presence, with exports reaching Europe, North America, South Korea, the United States, and several other regions. Supported by intelligent systems and world-class production infrastructure, Wangjin Holdings has emerged as an important contributor to the global supply chain for hygiene and disposable nonwoven products.

Another key aspect of the company's development strategy is its commitment to sustainability. Wangjin Holdings continues to invest in eco-friendly manufacturing practices, energy-efficient production systems, and high-quality recyclable material applications. These initiatives align closely with the global nonwoven industry's transition toward environmentally responsible manufacturing and circular economy practices.

Industry experts believe that the continued expansion of Wangjin Holdings demonstrates the rising demand for technologically advanced nonwoven materials across the hygiene, medical, and technical textile sectors. The company's ongoing investments in intelligent production lines and strategic partnerships position it strongly for future growth in increasingly competitive international markets.

For Trützschler, the cooperation once again highlights its role as a leading provider of advanced nonwoven technologies worldwide. With decades of expertise in carding, web forming, and thermobonding systems, the German machinery specialist continues to support global manufacturers in achieving higher productivity, better sustainability performance, and improved operational efficiency.

The signing ceremony in Geneva therefore symbolizes more than a commercial agreement. It represents the continued evolution of the nonwoven industry toward intelligent manufacturing, global collaboration, and sustainable industrial development. As Wangjin Holdings and Trützschler deepen their partnership, the industry can expect further breakthroughs that will shape the future of high-performance nonwoven manufacturing worldwide.
