OCTOBER 2026 | INDUSTRY SUSTAINABILITY UPDATE

RSWM Cuts Scope 1 Emissions by 40.5%, Sets Net-Zero Target for 2050

Sustainability Report FY2025–26 highlights progress in cleaner energy, resource efficiency and circularity

RSWM Limited unveils its Sustainability Report FY2025–26.

40.5%	21.27%	2050
reduction in Scope 1 emissions	reduction in Scope 1 + 2 emissions	net-zero emissions target

RSWM Limited, the flagship company of the LNJ Bhilwara Group, has released its Sustainability Report for FY2025–26, outlining progress in greenhouse-gas emissions reduction, energy efficiency, circularity, water stewardship and responsible manufacturing.

Lower emissions and energy use. During the year, Scope 1 emissions fell 40.5% year-on-year to 115,640 tCO_2e, while Scope 2 emissions declined 10.06% to 299,590 tCO_2e. Combined Scope 1 and Scope 2 emissions decreased 21.27% to 415,230 tCO_2e. Total energy consumption was reduced by 16.50% to 3,360.98 TJ.

Cleaner energy and circularity. RSWM consumed 126.7 million kWh of green energy and 36,055 MT of biofuel. The company reports that green energy meets around 60% of its overall energy needs and aims to raise the renewable-energy share to 70% by FY2026–27. It also recycles approximately 2,372 million PET bottles annually and treats and reuses 2.05 million kilolitres of water.

Targets for the next phase. Four industrial boilers have transitioned to biofuel, with work on two more in progress. RSWM aims for 100% biofuel usage across all boilers by FY2026–27 and has set a long-term net-zero emissions target for 2050. The report also records a 4.18% year-on-year decline in water withdrawal.

Leadership perspective. Chairman, Managing Director and CEO Riju Jhunjhunwala says sustainability is integral to how the company manufactures, innovates and creates long-term stakeholder value. Joint Managing Director Rajeev Gupta highlights operational efficiency and responsible resource use as priorities, with FY2026–27 targets focused on renewable energy and biofuel.
