VANDEWIELE GROUP brings the Full Textile Value Chain to India ITME 2026

From Fibre Testing to Finished Carpet — Innovation, Productivity and Smarter Manufacturing

4–9 DECEMBER 2026 | INDIA EXPO CENTRE & MART, GREATER NOIDA | HALL 15 – E2F1

Cabler & Twister machinery

Vandewiele Group will bring the breadth of the textile value chain to India ITME 2026, presenting technologies from fibre testing to finished carpet. The group will unite solutions from Vandewiele, Savio, Loepfe, Mesdan, SUPERBA, Bonas, Bejimac, Vandewiele Automation and BMSvision, alongside Vandewiele-Savio India Pvt. Ltd., with an objective: helping Indian mills improve productivity and quality while using less energy, raw material and labour.

A major attraction will be the live demonstration of the Cabler & Twister, designed for DTY, ATY and FDY fine-denier filament yarns. Visitors can see its process stability and flexibility in producing value-added yarns for premium carpets, rugs and textile applications.

Carpet manufacturers can explore the RCF face-to-face weaving machine, running at up to 250 rpm, the versatile UCF platform and the MAX91 Axminster system with up to 16 colour frames. The tufting portfolio offers both a proven standard platform and an advanced HST solution for high productivity and digital control. SUPERBA heat-setting technologies and the KR1 automatic knotting robot, capable of handling up to 240 packages per hour, add further highlights.

Visitors can also discover Savio winding, spinning and twisting systems; Loepfe yarn-clearing and monitoring technologies; Mesdan laboratory testing and yarn-joining solutions; and BMSvision's WeaveMaster MES platform with AI capabilities and advanced planning tools.

Why visit? One stand brings together machinery, testing, quality control, automation and digital manufacturing expertise. Mill owners and technical teams can compare solutions, discuss production challenges with specialists and identify ways to reduce waste, improve consistency and strengthen competitiveness.

Meet Vandewiele Group at India ITME 2026, 4–9 December, India Expo Centre & Mart, Greater Noida, Hall 15, Stand E2F1.

TECHNOLOGY SHOWCASE

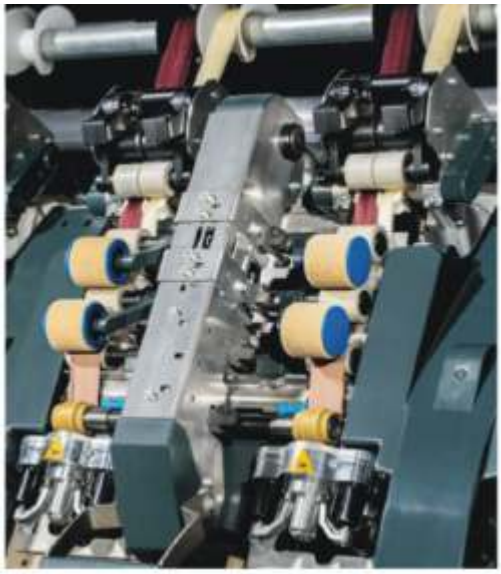

Carpet weaving: RCF, UCF and MAX91 technologies for productivity and design flexibility.

Tufting platform: standard and HST technology options.

TECHNOLOGY

WINDING, SPINNING AND TWISTING - SAVIO

YARN QUALITY CONTROL - LOEPFE

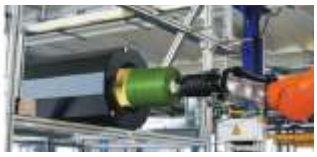

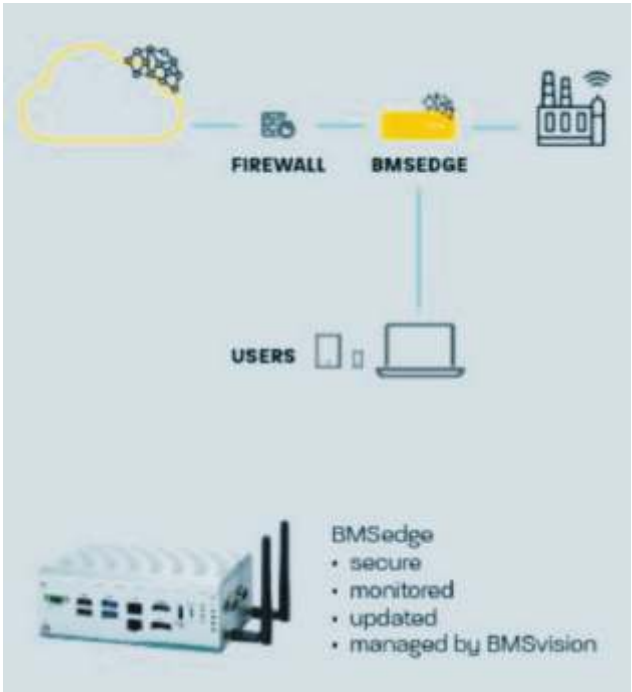

LABORATORY TESTING AND VARN JOINING - MESDAN

SUPERBA- world leader in heat-setting

KRl - automatic knotting robot

DIGITAL MANUFACTURING - BMSVISION
